Application/Control Number: 10/043,925

Art Unit: 3726

#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-3 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Punako (US Patent 3,792,417) in view of Trethewey (US Patent 5,548,871).

With regards to claims 1 and 3, Punako discloses a strain relief clamp 20 for use with a connector that is mounted on an end of a cable (abstract), the strain relief clamp including rectangular windows (45, 46) with a member (strap 60) arranged on the windows (col. 3, lines 56-63). Although the strap of Punako is not transparent, however bundling straps that can be opaque or transparent are well known in the art as attested by Trethewey, see column 3, lines 57-58. Therefore it would have been obvious to one of ordinary skill in the art at the tike the invention was made, to have used a transparent strap with the relief clamp of Punako, in light of the teachings of Trethewey, in order to achieve the benefits of using such known and readily available strap. Applicant should note that the recitation of the intended use has not been given any patentable weight. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of

Application/Control Number: 10/043,925

Art Unit: 3726

making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963). Marking of interest can be visible through the transparent portion of Punako's strain relief clamp.

For claim 2, Applicant should note that antikink protective sleeves are conventional with strain relief clamps.

For claim 18, see figure 6 of Punako.

#### Allowable Subject Matter

- 3. Claims 4-17 and 19 are allowed.
- 4. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### Response to Arguments

5. Applicant's arguments with respect to claims 1-3 and 18 have been considered but are most in view of the new ground(s) of rejection.

## Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Application/Control Number: 10/043,925

Art Unit: 3726

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Essama Omgba whose telephone number is (571) 272-4532. The examiner can normally be reached on M-F 9-6:30, 1st Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, George Nguyen can be reached on (571) 272-4491. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
